

1. Total Orders & Revenue

```
SELECT
COUNT(*) AS Total_Orders,
SUM(Revenue) AS Total_Revenue,
AVG(Revenue) AS Average_Order_Value
FROM Orders_Data;
```

2. Monthly Revenue

```
SELECT
    MONTH(Order_Date) AS Month_No,
    SUM(Revenue) AS Monthly_Revenue
FROM Orders_Data
GROUP BY MONTH(Order_Date)
ORDER BY Month_No;
```

3. Revenue by City

```
SELECT
    City,
    COUNT(*) AS Total_Orders,
    SUM(Revenue) AS Total_Revenue
FROM Orders_Data
GROUP BY City
ORDER BY Total_Revenue DESC;
```

4. Orders by Payment Method

```
SELECT
    Payment_Method,
    COUNT(*) AS Total_Orders,
```

```
SUM(Revenue) AS Total_Revenue
FROM Orders_Data
GROUP BY Payment_Method
ORDER BY Total_Orders DESC;
```

5.Orders by Platform

```
SELECT
    Platform,
    COUNT(*) AS Total_Orders,
    ROUND(
        COUNT(*) * 100.0 / (SELECT COUNT(*) FROM Orders_Data), 2
    ) AS Order_Percentage
FROM Orders_Data
GROUP BY Platform
ORDER BY Total_Orders DESC;
```

6. Average Delivery Time by City

```
SELECT
    City,
    ROUND(AVG(Delivery_Time_Min), 2) AS Avg_Delivery_Time
FROM Orders_Data
GROUP BY City
ORDER BY Avg_Delivery_Time;
```

7. Peak Ordering Hours

```
SELECT
    DATEPART(HOUR, Order_Time) AS Order_Hour,
    COUNT(*) AS Total_Orders
FROM Orders_Data
```

```
GROUP BY DATEPART(HOUR, Order_Time)
ORDER BY Total_Orders DESC;
```

8. Top 10 Restaurants by Revenue

```
SELECT TOP 10
    Restaurant_Name,
    COUNT(*) AS Total_Orders,
    SUM(Revenue) AS Total_Revenue
FROM Orders_Data
GROUP BY Restaurant_Name
ORDER BY Total_Revenue DESC;
```

9. Average Rating by City

```
SELECT
    City,
    ROUND(AVG(Rating), 2) AS Average_Rating,
    COUNT(*) AS Total_Orders
FROM Orders_Data
GROUP BY City
ORDER BY Average_Rating DESC;
```

10. Monthly Revenue Growth

```
WITH MonthlyRevenue AS (
    SELECT
        MONTH(Order_Date) AS Month_No,
        SUM(Revenue) AS Revenue
    FROM Orders_Data
    GROUP BY MONTH(Order_Date)
),
```

RevenueGrowth AS (

SELECT

Month_No,

Revenue,

LAG(Revenue) OVER (ORDER BY Month_No) AS Previous_Revenue

FROM MonthlyRevenue

)

SELECT

Month_No,

Revenue,

Previous_Revenue,

ROUND(

(Revenue - Previous_Revenue) * 100.0

/ NULLIF(Previous_Revenue, 0), 2

) AS Growth_Percentage

FROM RevenueGrowth

ORDER BY Month_No;
